About the Mark (all pages are common)

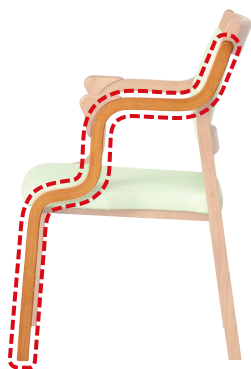

Laminated plywood frame

-light and strong

The laminated plywood, which is shaped by overlapping and crimping board, is characterized by being more flexible and stronger than ordinary wood.

The curve and straight line from the arm rest to the legs of the chair are integrated without joints to increase durability.

High Functional Upholstery

-Compatible with hypochlorous acid and alcohol resistance

High-functioning upholstery made in Japan is used to maintain cleanliness. It's easy to remove dirt from this type of Upholstery.

hypochlorous acid compatibility

Alcohol resistance

Non-use of hazardous substances

The upholstery can suppress the growth of bacteria

Stackable chairs

Since these chairs can be stacked together, they can be stored in layers without taking up much space when not in use. It's easier to arrange and clean up these chairs depending on the situation, you can use them flexibly.

Recommended stacking up to 4 chairs.

Waving tape

-You won't feel the bottom plate when you sit on these chairs.

Four-layered seat surface makes you less tired

- ①PVC upholstery (made in Japan)
- ②Urethane foam
- ③Chip Urethane
- ④Waving Tape

①Chip urethane, which is hard to wear out, is inserted between the soft ②urethane foam on the upper layer and the ③waving tape on the lower layer, so the surface is soft and moderately stretched. It is a stable seat that won't hurt your buttocks even if you sit for a long time.

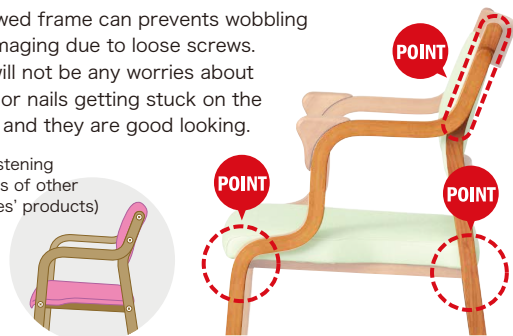

Unscrewable Frame

-For preventing wobbling and damaging due to loose screws

Unscrewed frame can prevent wobbling and damaging due to loose screws. There will not be any worries about clothes or nails getting stuck on the screws, and they are good looking.

screw fastening
(Examples of other companies' products)

Rotating Seat Surface

-You can sit & stand and change the direction of the body easily

You won't need to move the chairs in and out frequently.

Casters for Smooth Movement

With casters, you can move easily and smoothly. It's very convenient to use in narrow places.

Reclining

-It's convenient for lay back and relaxation.

This chair can be used in a variety of ways depending on the situation.

To achieve relaxation, these seats are reclinable. For activities such as watching TV or reading books, you can adjust the seat to an upright position.

These seats are adjustable, providing extra comfort and relaxation.

You Tube and Augmented Reality (AR)

For easier understanding of the product, you can check the videos and 3D images taken from various angles. Please use this app and check the products you are interested in !

*Products without QR code are not supported.

*AR is an augmented reality technology that reflects things on the smartphone as if there were there.

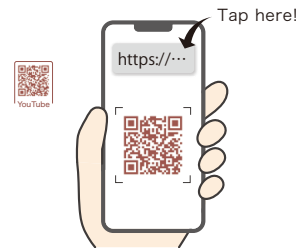

step 1

Start the QR code app or camera app that you usually use on your mobile phone screen.
(android/iPhone)

step 2

When the QR code is displayed on the camera, URL (information such as http://...) is also displayed. Please tap that URL.
*Please follow the instructions on your smartphone.

step 3

After that, the introduction video that you selected or 3D image (AR) will be displayed.

*If you scan the different QR code, please hide it and scan the QR code that you want to load again.

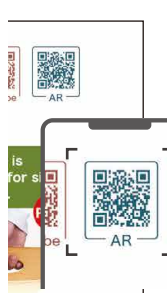

You Tube - Red QR Code

If you want to see the video, there is a QR code in red in the upper right corner of the product page. Please load it.

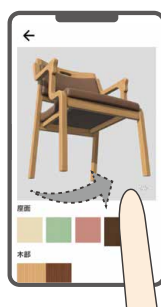

AR -Blue QR Code

1

If you want to see AR, there is a QR code in blue in the upper right corner of the product page. Please load it.

2

A 3D image is displayed. You can check the product from various angles when you swipe the product with your fingers.
*You can change the color image of the product by tapping the color display.

3

If you want to use AR, there is an AR mark in the lower right corner of the 3D image. Please tap it.

4

Please follow the instructions on the screen and move the smartphone to display the 3D image of the product in the camera.
*It may be difficult to operate in dark place.

5

You can swipe the the product in the camera with your finger to check the size and image in the place where you want to set up.
*There may be some errors in the size displayed in 3D

6

It is usually displayed at 100% for the space. If you change the size, you can zoom in and zoom out with your two fingers.
*If you want to check the size, we recommend that you display it at 100%.

AL-BR
(AL brown)

We use rotating disks made in Japan.

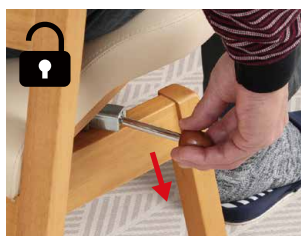

Setting 1

Automatic lock every 90° rotation

The seat can be locked at every 90° rotation. You can safely stand or sit with the properly designed armrest.

When the lever is not operated, the seat is always locked and does not rotate.

Lowering the lever releases the lock.

The lever automatically rises at every 90° and locks when you rotate the chair.

Setting 2

Unlock and rotate 360°

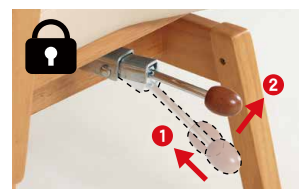

It can rotate 360° when the seat lock is released. It will be helpful when you want to change the body direction.

The seat can be rotated 360° freely until the lever is pushed back and locked.

Lowering and pulling the lever releases the 90° lock and rotates 360°.

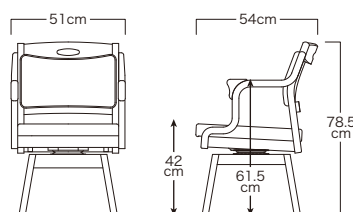

When you push the lever back ①, the 90° lock becomes valid. And when you rotate the seat, the lever automatically rises every 90° to secure the seat.

Swivel chair with armrest

Care-111-RAC

Material/ Flame: Natural wood (rubberwood). Urethane resin coating.
Rotating disk made in Japan. Cushion material: Urethane foam.
Upholstery: PVC (made in Japan) - Hypochlorous acid compatible

Melamine Decorative Board TM4 Series

Anti-Viral, Anti-bacterial Melamine table is effective for Virus Protection in the facilities.

TM4-K9090

TM4-K16590

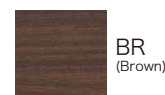

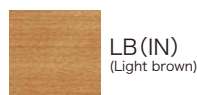

TM4-K18090

Provided by* Ibiboard Viruhael from Ibiken Co.Ltd

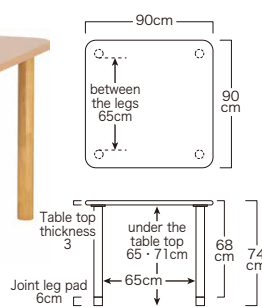

Wood color

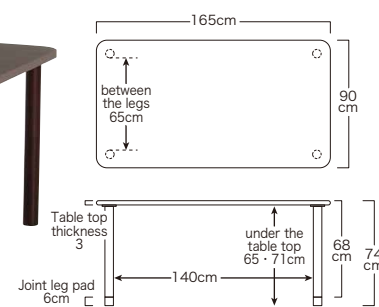

Melamine has excellent water, heat and friction resistance. So it is used for the tables and counters at hospitals or apartments due to its strength.

TM4-K9090

TM4-K16590

Anti-viral effect Data

*The data below is a measured value, not a guaranteed value.

*Due to the Pharmaceutical and Medical Device Act, specific virus names are not listed.

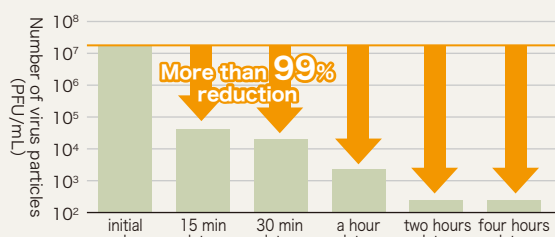

1

Effect verification by Bacteriophage Q β Test

The TM4 series is used for the melamine Decorative Board called Viruhael^{*}, which is effective for Anti-viral on table top boards. Ibiken Co.Ltd, which manufactures the Viruhael has a laboratory for the Anti-viral performance, and is committed to improving the quality of it. The result of this experiment appeared in fifteen minutes.

It turned out that the virus persistence rate decreased by more than 99% within fifteen minutes in the Bacteriophage Q β Test

The performance of anti-virus Immediate effect

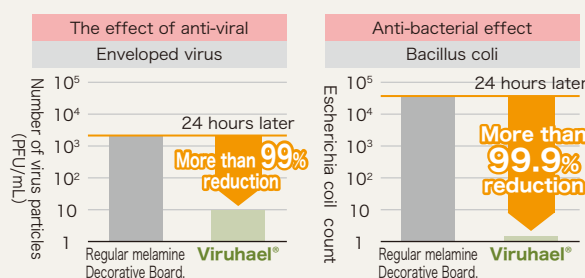

*Test method (measured in-house) compliant with JIS R1756:2020 *1 Ibiboard Viruhael^{*}

2

Effect verification by the test mechanism

It has been confirmed that the virus persistence rate after 24 hours decreased by 99% compared to regular melamine Decorative Board. In addition, it has excellent virus antibacterial effect regardless of the brightness or darkness of the room, because it is not photocatalyst processing.

It turned out that the virus or fungus specified by SIAA persistence rate decreased by more than 99% after 24 hours.

Test method (It was measured by General Incorporated Association Nikkensen Hinshitsu Hyouka Center) The left table: Compliant with ISO21702:2019 (Enveloped virus liquid of Infection value 3.15×10^7 (PFU/mL) was used.) The right table: Compliant with JIS Z2801:2010 (E.coli liquid of fungus liquid concentration 5.4×10^6 (piece/mL) was used.)

Caution: This product will reduce certain viruses attached to table top, but it is not assured that it will prevent infection. And anti-viral processing is not for the treatment and prevention of diseases.
